Late this afternoon, there was a very nice talk/discussion about the future (or a possible future) of Haiku, till R1. After a nice moment occurred. There was a toast to Haiku, Alpha1 and some of the main Haiku devs. Here's a picture of it: From left to right: Rene Gollent, François Revol, Michael Lotz, Marcus Overhagen, Stephan Aßmus, Axel Dörfler, Oliver Tappe and Jérôme Duval. P.S.: Sorry for the quality, I did no PP on it, just convert and resize (done in Haiku with ShowImage).
